Earmarks of a Mine.

Henry L. Driver has secured an option on the Klernan silver-copper property, twenty miles beyond Callentes, near the line of the San Pedro railroad, and he is congratulating himself that he has nailed a good thing. There is a shaft down on the property 250 feet, and all of 100 tons of ore on the dump. To get at the average value of the rock he had a ton of it shipped up and sampled. As he sold it for \$88.50 he feets that the proposition is a most promising one and tomorrow he will leave for camp for the purpose of inaugurating work and making some shipments from the dump. The ore brought up was sold on centrols showing \$8.7 ounces silver, 10.1 per cent copper and 50c gold.

The property is known as the Viola group and the ledge in it has shown an average of four feet between walls. Considerable work, in addition to sinking the shaft, has been done upon the ground, and now that transportation facilities are at hand. Mr. Driver believes that the mine can he made to pay handsomely.

Adjoining the Viola is another property upon which more than 700 feet of work has been done and which, according to assays that have been obtained on the deliver coal the day ordered.

rock from it, is fully as good if not better than the Viola. It has been presented to Captain O. A. Tibbitts, who expects to leave within a day or two to personally examine it. If it stands up to expectations its purchase will undoubtedly be undertaken.
